

Buttons:

Order Type: default will be Limit. Click on this button to show other order types: Market, Stop Loss, Stop Loss, Limit

Limit: will send a limit order at the price specified in the box. Change price by typing over the existing price, clicking the drop down box and using the values to adjust your price.

Market: will send your order out and fill at the market price. No price box since it's a market order:

Market Order

Notice, no price box with market orders.

Stop Loss: this order type allows you to place a stop order, when triggered at the stop price, becomes a market order:

Stop price:
when hit, order
is a market
order

Stop Loss Limit: this order type will give you two boxes to fill in with prices. The first box is the “stop price”. This price is the “trigger” price that activates the second price in the box, which is the limit price. When the stop price is hit, the order will go out as a **LIMIT** order at the price specified! It is NOT a market order like the Stop Order above!

Stop price:
trigger price to
send out order

Limit price: once
stop is triggered,
this is the limit
price of your
order
